

NIH Clinical Center
On the frontline of medical discovery
National Institutes of Health

National Institutes of Health is **seeking Parkinson's disease** subjects who are between 21-80 years of age and otherwise good health to participate in **Parkinson Clinic**

We invite you to take part in a series of tests including, genetic blood sample (LRRK2), memory testing, smell Identification test and neurological evaluation.

If you have Parkinson's disease and would like to consider taking part in important research studies at the NIH. There is no cost to participate. Patients will return to their own physician's care after taking part in a study.

NIH will provided travel and hotel, if needed.
